The Add and Edit Menu functionality makes it possible for a user to change the names of SAP Business One menus and add new menus/menu items. It is also possible for a menu item to execute a [universal function](#) when clicked.

Note: If you have Beas 9.3 PL 1 or higher installed, you can select Beas Functions on the Add and Edit Menu window.

When opening the Add And Edit Menu configuration you get the following screen where you can see a complete overview of the existing menus in SAP (including the ones added using add and edit menus)
