Restore default calendars

Refresh

Import

Export

Feature	Description
Create new calendar	Press this button if you wish to make a new calendar. On pressed you will be taken to the calendar editor .
Get Selected Calendar	Press this button if you wish to fill the selected calendar. Also can be done by double-clicking the row header. On pressed you will be taken to the calendar editor .
Remove Selected Calendar	Press this button to remove the selected Calendar. Please note that calendars are global and might be in use. (system will not break if in use, but the user will of course not be able to use it anymore).
Restore default Calendars	Press this button to restore one or more out of the box calendars to their original state (= bring back any removed default calendars). Warning: This will also restore all shared sources and file-keywords.
Export	Press this button to export one or more calendars (= the calendars sources and filters).
Import	Press this button to import calendars exported from another system (= calendars and sources linked to these calendars). Warning: During an import, sources and filters linked with the imported calendar with the same name in the database will be overwritten without prompt!
