Kanban Administration

Out of the box, the Kanban Boards Widgets come with a handful of predefined Boards people can use.

Production Orders

Projects

Sales Opportunities

Service Calls

SAP B1/UP Superusers can on top of this [add new Boards](#) and [Edit Existing](#)

Important things to understand about Kanban Boards:

- All Boards are shared across all users (meaning if you edit a boards all users will get that change!)
- You can on Kanban Boards defined which users have access to them (Super Users will by default ignore this setting)

Kanban Board Configuration (v-2021.05 - 32 kB) [9.3 PL14 MSSQL | 0020162055]
