The Merge table

In SAP Business One a user defined table: BOY_20_BMT – Letter merge – Merge table contains all the keywords needed to create a template

Field	Description
Document Value	Copy/paste the value you wish to use in your word template
Pre BP Value	Characters which can be placed before the 'Document Value' in the word document. This value is only visible after you merge the letter. The value could be a (or ' or ' or 'Name: ' and etc.
BP Value	BP Value is the field name
Post BP Value	Characters which can be placed after the 'Document Value' in the word document. This value is only visible after you merge the letter. The value could be a) or ' or ' or 'end' and etc.
Replace method	There are two ways to represent the BP Value 1 – Always = BP Value will always be shown 2 – Leave blank if BP value is empty = BP Value will only be shown if the Document Value contains data

#	Code	Name	Document value	Pre BP value	BP Value	Post BP value	Replace method
1	000000	00000000	<<CardCode>>		CardCode		Always
2	000000	00000001	<<CardName>>		CardName		Leave blank if BP value is empty
3	000000	00000002	<<CardPhone>>		CardPhone		Always
4	000000	00000003	<<CardFName>>		CardFName		Always
5	000000	00000004	<<GroupCode>>		GroupCode		Always
6	000000	00000005	<<GroupPhone>>		GroupPhone		Always
7	000000	00000006	<<CardTypeCode>>		CardTypeCode		Always
8	000000	00000007	<<CardType>>		CardType		Always
9	000000	00000008	<<Currency>>		Currency		Always
10	000000	00000009	<<Phone>>		Phone		Leave blank if BP value is empty
11	000000	00000010	<<Phone>>		Phone		Leave blank if BP value is empty
12	000000	00000011	<<Calendar>>		Calendar		Leave blank if BP value is empty
13	000000	00000012	<<Fax>>		Fax		Leave blank if BP value is empty
14	000000	00000013	<<E-Mail>>		E-Mail		Leave blank if BP value is empty
15	000000	00000014	<<InvStk>>		InvStk		Leave blank if BP value is empty

TIP: YOU HAVE THE OPTION TO ADD YOUR OWN USER DEFINED FIELDS TO THE TABLE (OPTIONAL YOU CAN USE WITHOUT EDITING THEM IN THE TABLE IN ORDER TO USE THE PRE AND POST VALUE. FOR HEADER FIELDS YOU ENTER <<U_LUID>> IN THE DOCUMENT VALUE AND U_LUID IN THE BP VALUE... FOR CONTACT PERSONS, ADD PREFIX CPRES (<<CPRES U_LUID>> + CPRES_UID) AND FOR ADDRESS BUDZ AND SHFTG ADD ADST AND USR ADST.

TIP: IN ADDITION TO <<ADST COUNTRY>> AND <<ADST COUNTRY>> YOU CAN USE <<ADST COUNTRY FULL>> AND <<ADST COUNTRY FULL>> IN ORDER TO GET THE FULL COUNTRY NAME

TIP: YOU CAN ALSO USE THE FOLLOWING KEYWORDS ABOUT CURRENTLY LOGGED IN USER: <<USER NAME>>, <<USER FULLNAME>> AND <<USER EMAIL>>
