Item specific Menus

It is possible to make the menu items item specific by making the menu conditional and use the 3 keywords in a SQL statement.

Keyword	Description
[CURRENT_ITEM]	Return the current item Uid in focus (Example if the right click on a Sales Order happened on the Customer code field the result back would be 4 as this is item 1284)
	Customer/Vendor Code C20000 (Format128 ItemId Paramet Variable=1 ORDER.CatCode)
[CURRENT_COLUMN]	Return the currently focused column (if any)
[CURRENT_ROW]	Return the currently focused row number (if any (else -1 is returned))

Example:

```
IF ([CURRENT_ITEM] = '128')
BEGIN
SELECT 'SO FOR BROWSE'
END
```

Condition result	Function to execute	Universal Function
1	SO	Universal Function v=1 UF-001

Add line

Remove line

This SQL statement will make the menu to show when you right click on item 128.
