Use password generator

[Previous](#) [Next](#) | [Direct link to this topic](#)

The password generator is a simple function to generate a password for the business partner master data window. When activated, you can CTRL + Dbl. click on the password field to generate a random password. You also have the option to create passwords for each contact person in the password field in the contact person tab by CTRL + Double-click the field.

**Setting – Show button:** If this is checked, a button will appear next to the password field. The button has the same functionality as a CTRL + Dbl. click

**Setting – Password Length:** Here you can choose the length of the generated password (1-32 characters). Default is 6 characters

**SPECIAL:** IF YOU ACTIVATE A PASSWORD GENERATION ON A FIELD THAT ALREADY CONTAINS A PASSWORD, YOU GET A PROMPT IF YOU WANT TO GENERATE A NEW PASSWORD, PRESS 'YES' TO GENERATE A NEW PASSWORD OR 'NO' TO LEAVE THE OLD PASSWORD.
