Use Journal Remark System

[Previous](#) [Next](#) | [Direct link to this topic](#)

The Journal Remark system allows you to override the default naming of the journal remarks for sales and purchase documents. You can define a template for the different document types by pressing the button and defining the different templates.

You can mass update the different templates selecting the template types you want to update and press the "Update selected" button. this will result in all the selected document types getting the template entered in the "Update selected templates" field

The templates can be either can use static text or one or more of these dynamic texts

String	Description
[CardCode]	The code of the business partner of the document
[CardName]	The name of the business partner of the document
[Ref]	The customer/vendor reference of the document
[DocNum]	The number of the document
[DocDate]	The Posting date of the document
[DueDate]	The Due date of the document
[TaxDate]	The tax date (document date) of the document
[PayRef]	The Payment Reference number of the document
[Item]	The item code of the first line of the document
[Description]	The item name of the first line of the document / The description of the first line of the document
[Type]	The type of the document (Like A/R Invoice etc.)

TIP: YOU CAN ALSO USE DYNAMIC SYNTAX AND SQL: IN THE TEMPLATE TO GENERATE JOURNAL REMARKS BASED ON INPUT
